

I am a paid subscriber to Satellite radio. I so chose to be because I can listen to a better quality of radio. The reason I am a subscriber is because they offer a better variety of things to listen to. I find their traffic and weather channels informative especailly when traveling in those areas. I don't want the National Association of Broadcasters to dictate what I can listen to. It is my choice to pay for a service and support Satellite Radio to recieve a better listening opportunit. I ask the FCC to rejec the NAB'S petition 04-160. I pay to listen to the kind of programming I wish. So do not take that right away from me
